EDUCATION

Western Michigan University

B.S. Computer Science | Apr 2019

GPA: 3.56/4 Cum Laude

Minor in Mathematics

Dean's List (Several Semesters)

Member – Pi Mu Epsilon

Member – Computer Club

SKILLS

PROGRAMMING LANGUAGES

Over 2000-5000 lines:

JavaScript • TypeScript •

HTML • CSS • Java

Familiar:

C# • Python • C/C++

DEVELOPMENT TOOLS

Angular • AngularJS • Google Analytics

• NodeJS • ExpressJS • Android •

Django • Gradle • Google App Engine

• Ionic • Git • Google AdMob • AWS •

Firebase • ThreeJS • PostgreSQL •

MySQL • NoSQL • Jira • Selenium •

Maven

COURSEWORK

MATHEMATICS & STATISTICS

• Calculus I, II, III, & IV

• Statistics Using R

• Linear Algebra

• Mathematical Proofs

COMPUTER SCIENCE

• Intro to Web Technologies

• Database Mgmt. Systems

• Data & File Structures

• Design & Analysis of Algorithms

• System Prog. Concepts

• Android Development

• Python Programming

• Operating Systems

• Software Development 1 & 2

INTERESTS & AWARDS

• Gave a speech at my high school graduation ceremony.

• Attended Google I/O 2016.

• Reached level 4 in Google's Foo-Bar challenge.

• Awarded Dean's List for several semesters.

EMPLOYMENT

Software Engineer 2 | 3 months

VMWare Inc. | Palo Alto, CA | Nov 2019 – Current

• Joined the Cloud Platform Business Unit (CPBU) R&D team, vSphere Web Client.

• Developing new features with all aspects of maintenance and testing done.

Western Michigan University, College of Engineering & Applied Sciences | Jan – Dec 2018

• Volunteered to do a complete rework of a web app for a non-profit organization.

• Implemented multiple testing methodologies to ensure better performance and usability.

• Integrated Google and PayPal APIs into the app improving user experience.

Western Michigan University, Office for Sustainability | Feb – Nov 2017

• Developed solutions for the Front-End & Back-End that improved customer feedback.

• Collaborated with cross-functional team providing solutions to ensure a more suitable system design for future expansion.

• Took on more team leading roles: Mentorship, Guidance, Meeting leader.

OPEN SOURCE CONTRIBUTIONS

Clarity.Design <https://github.com/vmware/clarity>

UX guidelines, HTML/CSS framework, and Angular components working together to craft exceptional experiences.

Auto-Type-Writer-Angular <https://github.com/aliitani/Auto-Type-Writer-Angular>

An Angular directive feature that acts as a typing effect that is sort off like a type writer.

TECHNICAL EXPERIENCE

Overwatch Hero Database | 18 months

An Angular Website: <https://overwatchhub.com/> | Jan 2018 - Present

• Developed a web app using Angular for a popular multiplayer game made by Blizzard Inc. with continuous review, update and maintainability of the overall build of the project.

• Daily users reported with Google Analytics and planned database and storage migration to AWS.

Cloud Media Storage | 6 months

An Ionic App: <https://github.com/aliitani/cloud-media-storage>

• Developed a cross-platform mobile app with native support allowing users to add, delete, update media files on the cloud, with real time updates to the DB.

Virtual Stock Portfolio | 5 months

Android App: <https://github.com/aliitani/Investment-Portfolio>

• Developed a mock investment app that acts as a virtual stock portfolio for registered users to add, edit, or delete stocks based on the ticker symbol retrieved from Yahoo.

Fire-Doc [Ng-doc] | 6 months

An Angular App: <https://github.com/aliitani/ng-doc>

• Developed a web-app for creating, editing, and storing documents on the cloud, integrated CRUD features with simultaneous updates.
